Objective

Frontend Developer and B.Tech Computer Science student with hands-on experience building responsive web applications using React.js, Material UI, Redux Toolkit, and REST APIs. Completed a frontend development internship where I developed reusable UI components, integrated APIs, and collaborated with backend teams. Passionate about creating scalable applications and continuously learning modern web technologies.

Education

YBN University

B.Tech in Computer Science Engineering
CGPA: 7.37

Ranchi, Jharkhand, India

2023–Present

Seventh Day Adventist School

Higher Secondary (12th)
71%

2021

Skills

Languages: C, C++, Java, JavaScript

Frontend: React.js, Material UI, HTML5, CSS3, tailwind css, Redux Toolkit, Redux-Saga, tailwind CSS

Mobile: React Native, Expo

Backend Basics: Node.js, REST APIs

Databases: MySQL, MS SQL, MongoDB

Tools: VS Code, Git, GitHub, Postman, Figma, Jupyter Notebook

Experience

Frontend Developer Intern — Eimple Labs

- Developing frontend features for a job-based web application using React.js and Material UI.
- Implemented API integration and state management using Redux Toolkit.
- Built reusable and responsive UI components for dynamic data rendering.

Projects

Jankoti (Job Recruitment Platform)

React.js, Material UI, Redux Toolkit, REST APIs

- Developed a job recruitment platform with authentication and job listing interfaces.
- Integrated backend APIs for user registration, login, and job management.
- Built reusable React components and responsive layouts.
- Managed application state using Redux Toolkit.

Rento Finder (Property Rental Platform)

React.js, Material UI

- Designed and developed a modern property rental and buying interface.
- Created reusable property cards, search filters, and responsive layouts.

- Implemented clean UI following Material Design principles.
- Improved user experience with responsive navigation and dynamic components.
